Redistricting Maps

Greetings Supervisors and Commissioners,

I am writing with reference to the finalization of remapping the representation District Maps for Los Angeles County Supervisorial Districts.

Upon review of the submission's I strongly encourage the selection of **Map B-1** (without modifications.)

This version of redistricting offers the clearest boundary lines while keeping the communities of interest impacting my Community in line with the greater communities of interest; the Foothill Communities. The Foothill Communities have a clear contiguous voice and need a common representation without division of neighborhoods and Cities in order to realize the best service and representation.

Kindly hear this voice of the Foothills.
